Susquehanna, May 18.-There comes from Masonville the strange story of a pedler and his horse. The vender of pins, needles and bric-a-brac landed at a farmer's home one night and asked to remain until morning, as his horse was sick. The farmer gave his consent and helped to doctor the horse, but, in spite of their combined efforts, the horse died, and they skinned it and went to bed. Some time after midnight the farmer was disturbed by hearing a strange noise, and arose to investigate, when he discovered that the horse had recovered and was frisking about to keep warm. Feeling sorry for the animal, he proceeded to cover it with a sheepskin, which took root and grew. It is further added that sheared from the horse a few months later, Truth appears to be stranger

THE MARKETS.

Wall Street Review.

York, May 18.-The improved to abroad was the sallent influence on the market, but it was aided by various faorable domestic factors in the situation There was in the tone of the stock market a reflected indifference to the possibility of action by the senate on the Cuban question that might be unacceptable to Spain, This was partly due to the belief preva-lent in Wall street that the administration has determined upon a conservative policy on Cuba, but holders of securities are also less inclined to timidity on ac-count of the agitation of the Cuban ques-tion than was formerly the case. Per-haps the restricted volume of the trading was due in part to the Cuban discussion in the senate, the total sales reaching only about 125,000 shares. Although about the half this amount was absorbed by the five leading stocks, the smaller sales were bet-ter distributed through the list than for some time past. The total sales of stock today were 132,413 shares.
